New York, NY, 10038 | ayesha_sq@live.in | (347) 680-7133 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SOC ANALYST | SECURITY ENGINEER | SIEM | INCIDENT RESPONSE | THREAT DETECTION

Cybersecurity Analyst with 2+ years of experience in security operations, threat detection, and incident investigation across enterprise and public-sector environments. Skilled in analyzing high-volume security telemetry using SIEM platforms (Splunk, Microsoft Sentinel) to identify anomalous activity and support rapid incident response. Experienced in log analysis, artifact correlation, and Python-based security automation mapped to MITRE ATT&CK. Proficient with EDR, IDS/IPS, vulnerability management, and security frameworks including NIST CSF and ISO 27001.

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems New York, NY	Jan 2024 - Dec 2025
Master of Science (MS) in Cybersecurity Concentration: Cyber Operations	
University of Mumbai Bachelor of Science (BS) in Information Technology Mumbai, India	Sep 2020 - May 2023

EXPERIENCE

New York City Department of Finance Cybersecurity Unit New York, NY	Jun 2025 - Dec 2025
- Monitored and triaged 200+ daily security alerts using Splunk SIEM, reducing false positives by 30% through refined search queries and correlation logic. - Analyzed network, endpoint, and cloud logs to identify anomalous authentication attempts and privilege misuse, improving early threat detection and preventing potential account compromise. - Investigated security incidents by performing root cause analysis and documenting timelines, containment steps, and remediation actions, improving incident reporting consistency by 40%.	

Namaksha Technologies Application Security Engineer India	Jan 2022 - Dec 2023
- Conducted application security assessments on internally developed web applications to identify and remediate vulnerabilities including SQL Injection, Cross-Site Scripting (XSS), and insecure input handling, strengthening application security and reducing exploitation risk. - Implemented secure authentication and authorization mechanisms across enterprise applications using role-based access controls and session management, ensuring controlled user access and protection of sensitive system data. - Designed secure data transmission workflows by encrypting sensitive data exchanges between application components and external systems, preventing unauthorized interception and improving data confidentiality.	

PROJECTS

SOC Dashboard Next.js, React, TypeScript, Python, FastAPI, Cloud	Feb 2026
Architected full-stack security monitoring platform with automated investigation playbooks reducing MTTR by 95%, real-time WebSocket threat feed, interactive attack map visualizing 16+ countries, ML-powered alert correlation, and CI/CD deployment pipeline.	

Security Compliance Checker	Jan 2026
Built full-stack macOS security compliance scanner with Python backend performing 17+ CIS benchmark checks with real-time dashboard (FileVault, SIP, XProtect) with Python, React/Next.js, and educational insights, and automated remediation guidance; deployed on Vercel with CI/CD pipeline.	

AI Security Log Analyzer Python, SIEM, Cloud Security	Dec 2025
Designed and implemented a Python-based system to analyze and correlate large volumes of security telemetry (identity, cloud, endpoint, and network logs) to detect credential abuse, brute-force activity, ransomware indicators, and cloud misuse mapped to MITRE ATT&CK.	

Network Defense for Luna Bags using Splunk SIEM for Real-Time Threat Detection	Sep 2024 - Dec 2024
Deployed and configured Splunk Enterprise SIEM to monitor internal, DMZ, and cloud traffic, enabling automated threat detection and alerting for DDoS, data exfiltration, and anomalous activity, while strengthening IDS, access controls, and PCI-DSS compliance to protect sensitive payment data.	

SKILLS

Programming Languages: C, C++ , SQL, HTML, Python, Java, Bash Scripting, PowerShell Scripting, Docker.

Security Frameworks: NIST CSF, ISO 27001-2, Zero-Trust, COBIT, PCI-DSS, HIPAA/HITECH, HIPAA, SOC2, MITRE ATT&CK

Networking & Security Skills: Network Traffic Analysis, IDS/IPS, Endpoint Security, Authentication & Authorization, Alert Triage, Threat Detection, IDS/IPS, EDR, Root Cause Analysis, RBAC, SDLC, Incident Response, Security Monitoring, SOC, Vulnerability Management, Log Analysis, Firewall Management, Identity and Access Management, API Security, Automation, CI/CD Security.

Security Tools: Splunk SIEM, ServiceNow, Windows, Linux System, Tenable/Nessus, Rapid7, Microsoft Sentinel, CrowdStrike, Wireshark, Nmap, Burp Suite, pfSense, Terraform, Docker, Kubernetes, Azure AD, Okta.

Training: WiCyS eCTF (active), Foundation of AI Security, Splunk Operations and Defense Analyst, Investigating with Splunk, Cryptographic Encryption, CompTIA Security+ (Active), AI Cybersecurity.
